

Contents

| | |
|---|-----|
| Introduction | 1 |
| Section I Epidemiology and Models of Colorectal Cancer | |
| 1 Colorectal Cancer: Epidemiology | 5 |
| John D. Potter and David Hunter | |
| 2 Mouse Models of Intestinal Cancer | 27 |
| Erin M. Perchiniak and Joanna Groden | |
| Section II Pathways to Colorectal Cancer | |
| 3 The Chromosomal-Instability Pathway and APC Gene Mutation in Colorectal Cancer | 53 |
| Robert Gryfe | |
| 4 DNA Methylation in Colorectal Cancer: Multiple Facets of Tumorigenesis | 73 |
| Joanne P. Young and Peter W. Laird | |
| 5 Pathways and Pathology | 97 |
| Jeremy R. Jass | |
| Section III Germline Susceptibility – Mendelian and Other Syndromes | |
| 6 Familial Adenomatous Polyposis | 125 |
| Julian A. Sanchez, Graham Casey, and James M. Church | |
| 7 DNA Mismatch Repair and Lynch Syndrome | 141 |
| Brittany C. Thomas, Matthew J. Ferber, and Noralane M. Lindor | |

| | | |
|---|--|-----|
| 8 | Additional Syndromes with Hereditary Predisposition to Colorectal Cancer | |
| 8.1 | <i>MUTYH</i>-Associated Polyposis | 173 |
| | Spring Holter and Steven Gallinger | |
| 8.2 | Familial Colorectal Cancer Type X | 183 |
| | Noralane M. Lindor | |
| 8.3 | Families with Serrated Neoplasia of the Colon | 187 |
| | Joanne P. Young | |
| 8.4 | Peutz-Jeghers Syndrome | 193 |
| | Douglas L. Riegert-Johnson and Lisa A. Boardman | |
| 8.5 | Juvenile Polyposis | 199 |
| | Kara A. Mensink, Jeremy R. Jass, and Noralane M. Lindor | |
| 8.6 | <i>BLM</i> mutation and Colorectal Cancer Susceptibility | 207 |
| | Beatriz Russell and Joanna Groden | |
| 8.7 | The Role of <i>p53</i> in Colorectal Cancer | 213 |
| | Serena Masciari and Sapna Syngal | |
| 8.8 | Chromosomes 8q24 and 9p24: Associations with Colorectal Cancer | 219 |
| | John D. Potter | |
| Section IV Germline Susceptibility – Gene-Environment Interactions | | |
| 9 | Genetic Variability in Folate-Mediated One-Carbon Metabolism and Risk of Colorectal Neoplasia | 223 |
| | Amy Y. Liu and Cornelia M. Ulrich | |
| 10 | Genetic Variability in NSAID Targets and NSAID-Metabolizing Enzymes and Colorectal Neoplasia | 243 |
| | Elizabeth M. Poole, James T. Cross, John D. Potter, and Cornelia M. Ulrich | |
| 11 | The Role of Chemical Carcinogens and Their Biotransformation in Colorectal Cancer | 261 |
| | Loïc Le Marchand | |
| 12 | Calcium and Vitamin D | 277 |
| | Roberd M. Bostick, Michael Goodman, and Eduard Sidelnikov | |
| | Index | 299 |
